Revenue Operations | GTM Strategy | Sales Strategy & Operations | Commercial Planning | Pittsburgh, PA (open to relocation)
KPI Governance | Forecasting | Incentive Design | Executive Reviews [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Revenue Operations and GTM Strategy leader with a track record of building scalable commercial operating systems across enterprise and consumer businesses. At Bajaj Electricals, owned a ~\$100M commercial operation across 97 people, 15 regions, and 200+ channel partners; delivered 20% YoY revenue growth through redesigned incentive architecture, territory planning, and VP-level business reviews adopted as national standards. At Allegheny County DHS, built 0-to-1 KPI governance and forecasting infrastructure across a \$1B+ portfolio; reduced fund reallocations 80%, compressed QBR cycles from 5 days to 2, and freed ~\$100M in misallocated funds. Proven cross-functional leader who bridges field execution, finance, and executive decision-making. Active daily user of generative AI tools including Claude API and Apify to drive productivity across planning, analysis, and reporting workflows. Technically fluent in SQL, Power BI, Tableau, Excel modeling, and Salesforce CRM.

| ▪ Channel Strategy & Transformation | ▪ Executive Reporting | ▪ Commercial Analytics |
| ▪ Cross-Functional Leadership | ▪ Process Transformation | ▪ Power BI SQL Excel Salesforce |

PROFESSIONAL EXPERIENCE

Sales Strategy & Operations Lead | Regional Channel Marketing Manager, Bajaj Electricals Ltd. Jun 2017 – May 2023
~\$100M Business | 15 Regions | 95 Territories | 200+ Distributors | 80,000+ Retailers | Team: 97

Retailer Incentive Program Redesign | Revenue Operations & Channel Engagement Transformation

- Owned end-to-end redesign of a national retailer loyalty program for 200,000+ retailers and 350+ field reps after structural complexity drove participation to 15%; incentive budget generating zero behavioral change across 85% of the retailer network, with 35% of targeted retailers remaining inactive despite direct rep outreach.
- Drove cross-functional alignment with Finance and Sales leadership using Excel scenario modeling to migrate from 13 irregular 28-day cycles to a standardized 12-month structure; partnered with the Product team to deploy app-based weekly self-tracking for 200,000+ retailers, simplifying qualification from multi-variable tiers to straightforward value/volume targets, and led change management across 350+ reps for consistent last-mile adoption.
- Increased retailer participation from 15% to 55% within 3 to 6 months, reactivated 35% of previously inactive targeted retailers, delivered 15% sales uplift, and drove 25% increase in SKU billing depth across the 200,000+ retailer network.

Distributor ROI Improvement | Revenue Operations & Working Capital Optimization

- Transformed distributor profitability across 100 distributors and 50 reps to address 18 to 20% ROI performance; well below the 24 to 30% target; driven by market outstanding at 1.5 to 2x monthly sales, blocked working capital, and sales teams incentivized purely on revenue with zero collections accountability.
- Redesigned incentive structure using Excel-based dual-trigger payout modeling to reward both sales achievement and same-day collection milestones; operationalized real-time CRM-tracked collection workflows for 100 distributors, and designed structured range-selling training for 50 reps to shift SKU mix toward mid and premium products, improving inventory rotation and distributor ROI contribution.
- Reduced market outstanding from 1.5 to 2x to 1.2x monthly sales, improved payment collections by 55%, increased distributor ROI by 25 to 50% toward the 24 to 30% target, and shifted 50-rep field execution from revenue-only selling to collections-and-profitability-driven channel management.

Stock Availability Optimization | Inventory Planning & Revenue Recovery

- Led inventory transformation across 200+ distributors, 50 territories, and 600+ SKUs to eliminate a 15 to 25% recurring monthly sales loss caused by chronic stock-outs; 40% of SKUs experiencing persistent unavailability, permanently eroding retailer confidence in high-margin mid and premium segments.
- Built SKU-wise stocking norms in Excel for 600 SKUs using sales velocity, seasonality, and demand-frequency analysis; collaborated cross-functionally with Supply Chain and Territory leadership to enforce minimum stock thresholds, and implemented ERP-driven replenishment cadences with weekly rep-level execution reviews to standardize ordering behavior across 50 territories.
- Reduced monthly sales loss from 15 to 25% to near zero, improved SKU availability by 45% across 200+ distributors, recovered 15 to 18% incremental sales growth within 2 quarters, and rebuilt retailer order fulfillment confidence across mid and premium product categories.

0→1 Digital Loyalty Infrastructure | QR-Based Platform Build & WhatsApp GTM

- Designed and launched a QR-based digital loyalty program from scratch across 1,000 retailers to address premium product mix stagnating at 15%; zero digital infrastructure existed to track or influence recommendation behavior; simultaneously pioneered WhatsApp-based cross-channel GTM motion during COVID lockdown activating 95 reps across 15 regions within one week.

- Built loyalty program end-to-end in 3 months; conducted 50+ field retailer interviews, ran 84-retailer pilot via Excel analysis, deployed QR-based self-tracking and digital redemption flows; launched WhatsApp Business campaign with product demo videos and Google Forms ordering; activated 95 reps with daily Excel-tracked dashboards and structured coaching.
- Activated 49,000+ loyalty points redeemed (~\$100K retailer incentive value); improved premium product mix from 15% to 20%; generated \$2M revenue in 3 days with zero incremental spend; cleared 25% of \$8M aged inventory; both mechanisms scaled nationally as repeatable commercial playbooks.

Data Analyst II | Budget Analyst II, Allegheny County Dept. of Human Services

Jul 2023 – Present

\$1B+ Budget | 8 Departments | 4 Vendor Contracts | Strategy & Operations

Enterprise KPI Governance | 0→1 Performance Framework Build

- Built county-wide KPI governance system from scratch across 8 departments and 4 vendor contracts managing \$1B+ in annual spend; no unified performance framework existed, every cross-functional review required custom data pulls, and 5 to 6 ad hoc requests per month consumed significant analyst and leadership time with no mechanism for proactive strategic gap-closure.
- Used SQL to extract and validate data across 8 departmental sources, defined 8 standardized KPIs covering performance, utilization, and compliance; facilitated structured alignment sessions with 8 department heads and 4 vendor leads; deployed Power BI dashboards organization-wide and published self-serve SharePoint reports; delivered full system with a 2-person team in 2 months.
- Reduced ad hoc data requests by 55% within 2 months, standardized 8 KPIs across 8 departments and 4 vendor contracts, enabled leadership to shift from reactive data-chasing to strategic gap-closure in quarterly reviews, and delivered a replicable governance model for future program expansions.

Multi-Department Budget Forecasting & Planning | \$1B+ Portfolio

- Transformed enterprise budget forecasting across a \$1B+ annual portfolio spanning 8 departments; forecast imprecision was generating 50 to 60 fund reallocations per year, approximately \$100M in funds were misallocated at any given time, and 10% forecast error rates made confident expense planning impossible for 16 department heads and stakeholders.
- Queried 5 years of historical spending data across all cost centers using SQL to identify trend patterns, seasonality drivers, and variance outliers; built multi-scenario forecasting models in Excel incorporating trend analysis and policy-driven expense flags; facilitated alignment sessions with 16 department heads; built proactive reallocation early-warning system linked to Workday Financials.
- Reduced fund reallocations from 50 to 60 per year to 10 to 15 (80% reduction), cut manual effort per cycle from 12 days to 3 days (70% efficiency improvement), freed approximately \$100M in previously misallocated funds, and reduced forecast error from 10% to near zero across all 8 departments.

EARLIER CAREER

Sales Leadership & Commercial Roles | Asian Paints | Philips India | Godrej | Samsung | Bajaj Electricals

2004 – 2017

Territory Strategy, GTM Execution, Performance Analytics | Progressed from Territory Sales Incharge to Area Manager

- Managed territory P&Ls from \$1M to \$6M across Tier 2/3 markets; built and coached teams of 4 to 8; ranked top 10% of regional performance cohorts; earned 3 regional performance awards.
- At Bajaj Electricals (Area Manager): redesigned territory coverage model using data-driven account segmentation; improved revenue per account by 40% within 2 quarters.
- At Philips India: built sub-partner GTM framework for new product category launch; grew distribution from 0 to 30 active points in 6 months; model adopted across 3 additional regions.

EDUCATION

PG Diploma in Data Science & Analytics - McCombs School of Business, The University of Texas at Austin

B.Sc. Mathematics - St. Joseph's College, Bharathidasan University

TECHNOLOGIES & SKILLS

Analytics & BI: SQL (PostgreSQL, BigQuery) | Power BI | Tableau | Excel (advanced modeling, scenario analysis, Power Query)

CRM & Enterprise: Salesforce CRM | Workday Financials | SAP | ERP systems

Strategy & Ops: KPI governance | Revenue forecasting | Incentive design | GTM planning | Channel operations | 0→1 program builds

AI Tools: Claude API (Anthropic) | Apify | Generative AI (daily practice) | Prompt engineering | Workflow automation
